

Year 1 SRE Planning

Learning Challenge:		Can I explore animal babies?	
Outline of the session: Play 'Guess what I am' - One child comes to the front as using actions to show an animal we have looked at within our topic- TYP- What is the animal? Read the story- Monkey Puzzle Discuss the story: How did we know it wasn't his mum and dad? Is this the same as our families? Do all animals reproduce the same species? Do all animal babies and adults resemble each other? Discuss how we might all look different but we are the same in lots of ways- Where have we all come from? Do 'different looking' babies grow into adults like their parents? Are all babies born in the same way?			
Part One Discuss with Blue group their responses		Part Two Assist Pink and encourage conversation	
Working Below What they will do and how we will know they have been successful	Working Within What they will do and how we will know they have been successful	Working Above What they will do and how we will know they have been successful	
Work as a team: Match the pictures of the animal babies to their mothers. How did you make the decision?	In pairs match the babies to their parents. Can you find some of these animals in our non-fiction topic book? Can you say what type of animal group do they belong to?	Ask the children to write a speech bubble that explains what we have discussed in the lesson. Can you compare this to yourself? Are they identical?
